

*Prior to the submission of the independent consultant's assessment of the noise emissions in accordance with the requirements of this condition, the wind farm operator shall submit to the East Cambridgeshire Planning Authority for written approval a proposed assessment protocol setting out the range of meteorological and operational conditions (which shall include the range of wind speeds, wind directions, power generation and times of day) to determine the assessment of noise emissions.*

*The proposed range of conditions shall be those which prevailed during times when the complainant alleges there was disturbance due to noise, or are identified as causing greater than expected amplitude modulation, having regard to the written request of the East Cambridgeshire Planning Authority, and such other conditions as the independent consultant considers likely to result in a breach of the noise limits. The assessment of the noise emissions shall be undertaken in accordance with the assessment protocol approved in writing by the East Cambridgeshire Planning Authority.*

*The wind farm operator shall provide to the Local Planning Authority the independent consultant's assessment of greater than expected amplitude modulation within 2 months of the date of the written request of the Local Planning Authority unless the time limit is extended in writing by the Local Planning Authority. The assessment shall include all data collected for the purposes of undertaking the compliance measurements, such data to be provided in the format set out in the Guidance Note to this condition.*

*The wind farm operator shall continuously log power production, nacelle wind speed, nacelle wind direction and nacelle orientation at the wind turbine. 10m height wind speeds averaged over 10 minute periods shall be measured at a location approved by the local planning authority for comparison with noise levels, for the duration of the noise level compliance check survey. Rainfall shall also be measured during any measurement regime at a location approved by the East Cambridgeshire Planning authority in writing. These data obtained shall be retained for the life of the planning permission. The wind farm operator shall provide this information in the format set out in the Guidance Note to the East Cambridgeshire Planning Authority on its request, within 14 days of receipt in writing of such a request.*

*Once the East Cambridgeshire Planning Authority has received the independent consultant's noise assessment required by this condition, including all noise measurements and audio recordings, where the East Cambridgeshire Planning Authority is satisfied of an established breach of the noise limit, upon notification by the East Cambridgeshire*
